Subject: Enhancement of stagnant cotton productivity in the country.

Dear Madam,

The National Seed Association of India (NSAI) is an apex body of seed companies of the Indian seed sector having around 400 members across the country. Being the apex body representing the seed industry, NSAI engages with partners and assists various government, regulatory and scientific entities in enabling a favourable policy and creating conducive environment for the growth of the seed industry in India. The members of NSAI develop and produce high potential hybrids/varieties of various crop including cotton suiting to the requirements of farmers in different agro climatic zones of the country.

NSAI has made a representation to the hon'ble Prime Minister proposing various measure for enhancing cotton productivity through high quality cotton seeds produced by the Indian seed industry which is as per the vision of the Hon'ble Prime Minister for making Atmanirbhar Bharat. A representation made by NSAI to the Hon'ble Prime Minister of India is attached for your kind perusals and favourable action in this matter.

Regards,

Yours sincerely,

R K Trivedi
